Office Memorandum • UNITED STATES GOVERNMENT

TO : Chief, Engineering Division, OC

DATE: 01 MAY 1958

O&T-58-586

FROM : Chief, Operations & Training Division, OC

SUBJECT: Signal Plan for Evaluation 25X1
25X1

1. Forwarded herewith are three copies of a communications test plan as requested. The plan included the following:

- A. Outline of Hours of Operation
- B. Time-Frequency Table for Testing
- C. Time-Frequency Table for CW Order Circuit
- D. List of Operating Signals for Prosigns for use on the Order Circuit

25X1

2. The frequencies to be used during these tests were chosen from the 99% reliable portion of the propagation curves.

3. The channel numbers were written into the chart in pencil. If it becomes necessary to change a channel, erase the old channel number and write in the new one. Advise the receiving station of all changes via the CW order circuit.

4. Test information pertaining to Phase "C" was not included in attached document, because of the questionable status of the required telephone lines. Should these lines become available, then the necessary information must be provided each terminal.
